## General Purpose Ultrasound Phantom Model 054GS

The CIRS Model 054GS General Purpose Ultrasound Phantom contains gray scale targets and improved sensitivity targets that exceed the phantom requirements outlined in the ACR accreditation program.

The phantom is made of CIRS' proprietary Zerdine<sup>®</sup> hydrogel polymer, which has been formulated to provide tissue mimicking properties including compatibility with harmonic imaging. To maximize phantom lifetime, this gel is contained in a rugged ABS plastic housing with a Saran-based laminate membrane.

CIRS ultrasound QA phantoms come standard with a robust housing, rugged carry case, 48-month warranty and user's guide.

# Exceed ACR Accreditation Requirements

- Test the full range of standard diagnostic ultrasound probes (2 MHz to18 MHz)
- Detachable water wells allow for testing curvilinear and endocavity probes
- Ensure over ten years of reliable use through reinspection and repair services

Includes best in industry four-year warranty
